Subject: RE: ot results from Dec 2008

Julie, December of 2008 we did a push on OT. We mainly did single bag marijuanas. We worked 94 hours ot in Boston and completed 778 items. I would estimate a chemist can average 6-8 marijuanas/hour, start to finish.

Subject: internship possibility

Hi Kerri,

I am sorry that I missed your visit to the lab on Monday. Both Chuck Salemi & Betsy O'Brien agreed that you'd make an excellent intern at the Drug Laboratory this summer. If you could email me with your availability and how many hours/per week you are able to work, we can move forward with getting you started. Is there paperwork for Suffolk that I need to complete? We will require a background check prior to you starting and you will need to complete privacy training as well as some building orientation on your first day.

I look forward to meeting you,
Julie Nassif

Subject: Visit to your labs
Hi Julie,

Keri LaBelle and I enjoyed the visit to your lab. We are disappointed that you could not be there, but hope your son is doing well. We heard he was sick. Beth and Chuck took us on a great tour. It was very good to see your setup. Keri is very interested in working there for her Forensic Practicum and we hope you will be able to work her in. If you should be able to make a positive decision this week, please email Keri since I will be out of town on vacation until Monday.

Her email is [REDACTED]
Cell Phone: [REDACTED]

Additionally, I have a prospective project with a company regarding the analysis of drugs with portable instruments. I am interested in knowing if it is possible to conduct a collaborative study with your people and possibly the police in the evaluation of these instruments. We can talk about it if your are willing and able.

I look forward to your response.

Best regards,

Ed
